

Progressive vesting of the Mondo Community Coin

As a utility token, the Mondo Community Coin is naturally oriented towards providing its holders with a lasting added value. This advantage is made possible by the progressive vesting principle (waterfall principle) of the coin. An embedded logic guarantees that the coins become available with a time delay.

This ensures price stability, manipulation security with regard to the value development and makes the MNDCC attractive for long-term oriented interested parties.

YEAR 1	6%	YEAR 2	50%	YEAR 3	
1. Month	0,50%	13. Month	6,50%	25. Month	60,0%
2. Month	1,00%	14. Month	7,00%	26. Month	70,0%
3. Month	1,50%	15. Month	7,50%	27. Month	80,0%
4. Month	2,00%	16. Month	8,00%	28. Month	90,0%
5. Month	2,50%	17. Month	8,50%	29. Month	100,0%
